

PP-Homopolymer Bioriented Film

Grade	MFR(gr/10min)	Properties
--------------	----------------------	-------------------

Name	(5kg,190OC)
-------------	--------------------

S28F	1.8	Excellent processability and low water carry- over. High gloss & transparency. Good optical properties.
------	-----	---

S38F	1.8	High transparency and gloss. Very stable extrusion. Good mechanical properties.
------	-----	---

S38FT	1.8	Excellent process- ability on tubular lines.
-------	-----	--

T36F	2.5	Excellent processability on cast lines, high transparency and gloss.
------	-----	--

Application

Film for packaging, special grade for metallization. Monolayer and co extruded film. Also suitable for lamination to other flexible films.

Monolayer films are used for food packaging, textiles packaging and flower wrappings, double bubble lines, adhesive tapes. BOPP films are used for lamination to other flexible films.

Adhesive tapes. Packaging in general.

Monolayer films are used for food packaging, textiles packaging and also for medical application.
