

## PP-Random Copolymer Injection Molding

### Grade Name <sup>MFR(gr/10min)</sup> (5kg,190OC)

| Properties  |
|---|
| EP2X83CI 10<br>Excellent clarity and gloss.   |
| EP2YX29GA 10<br>Excellent flow and antistatic properties with very high transparency and gloss. |
| RP340R 25<br>High melt flow and outstanding transparency and gloss.                             |

### Application

Transparent house wares, food storage containers and packaging cosmetics and lids, caps and closures.

Containers and thin-walled packaging with high clarity for food, cosmetics and pharmaceutical products. It also can replace PS whilst adding low weight, low odor transfer, chemical resistance and impact strength.

Packaging for food and cosmetics, pharmaceutical products. Injection molded items for the medical sector such as syringes, test tubes and vials. Suitable for injection stretch blow molded containers and bottles.
